Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/07/2005 has been entered. Claim 5 is pending.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- In Specification p. 1, the first paragraph has been changed to -- This is a continuation application of U.S. Patent Application No. 09/668,375, filed on September 25, 2000; now US patent No. 6,707,782 B1--.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

- With regard to claim 5, as the closest reference on record, Price et al (US 5,826,325) shows an information recording and/or reading apparatus, including: a base plate having a notch therein, a support plate, a spindle motor having an inherent output shaft perpendicular to the base plate, the output

shaft rotatably driving a disk; a head unit including a motor supported on the support plate by portion, and for determining a rotation position of a recording/reading head of the head unit about a rotary axis parallel to the output shaft of the spindle motor; a vertical pivot shaft at the center of extending parallel to the rotary axis; and a pivot mechanism for pivoting the support plate, on which the head unit is supported, about the vertical shaft relative to the base plate, wherein at least a portion of the head unit passes through the notch; **but fails to show** that the vertical pivot shaft disposed apart from the rotary axis and an encoder included in head unit and a moving stage, which mounts the spindle motor and a stage driving mechanism for driving said moving stage toward or away from the rotary alignment axis.

- Applicant asserts: the present invention is to “provide an information recording/reading apparatus which allows very easy exchange of a recording/reading head and disks and can avoid troubles such as damage to the recording/reading head and disk during exchange” (Specification, p. 2).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
